GROUNDING

INTERSYSTEM BONDING TERMINATION

2008 NEC article 250.94 requirements
• An intersystem bonding termination for connecting intersystem bonding and grounding conductors required for other systems shall be provided external to enclosures at the service equipment and at the disconnecting means for any additional buildings or structures.
• The intersystem bonding termination shall be accessible for connection and inspection. The intersystem bonding termination shall have the capacity for connection of not less than three intersystem bonding conductors.
• The intersystem bonding termination device shall not interfere with opening a service or metering equipment enclosure.

Use to connect multiple intersystem conductors per NEC 250.94
Accommodates up to 4 intersystem wires
All hardware is stainless steel

BONDING BAR KIT – BRONZE
